

LC0320

8 Chanel Light Control System
designed for A318, A319, A320, A321, A330, A340,
A350 and A380

LC0320

Key features

Electrical

- + master-slave operation
256 controllers respectively with
1024 channels possible
- + possible auxiliary functions
CIDS, WAN, LAN, etc
- + suitable for 28 V supply voltage

Mechanical

- + MU0325 memory unit for light
controllers included
- + mech. compatible to LC0300 series
- + fully qualified acc. to RTCA-DO160

Other

- + 8 separately controlled PWM outputs
- + applicable for LED lights or
incandescent lamps
- + MTBF > 100.000 OH

Technical data

Mechanical dimensions

| | |
|--------|---------------------------|
| length | 209 mm |
| width | 115 mm |
| height | 40 mm |
| weight | 470 g (+20 g Memory Unit) |

Electrical data

| | |
|----------------|--------------------------------------|
| input voltage | 28 V DC |
| input current | max. 5.1 A |
| output voltage | 8 x 28 V PWM (pulse width modulated) |
| output power | 140 W |
